PROFILE SUMMARY

Software Engineer with 4+ years of experience in PHP/Symfony development, CRM customization, and API integration. Specialized in extending and building on top of Vtiger CRM, including custom modules, web services, and third-party integrations (Google Looker Studio, Thunderbird). Currently building a proprietary CRM platform using Symfony and Node.js. Strong background in full-stack problem solving, clean API design, and working with AI-assisted development workflows.

WORK EXPERIENCE

Software Engineer — CCJK Technologies *May 2022 – Present*
Lahore, Pakistan

- Developed and maintained custom modules and features for Vtiger CRM (open-source), tailoring core functionality to client-specific business requirements.
- Built and integrated web service APIs and external API connections, including syncing CRM data with Google Looker Studio for real-time reporting and analytics.
- Designed and implemented a custom Symfony application integrated with Vtiger CRM and other internal systems to streamline cross-platform workflows.
- Built a custom Thunderbird Add-on to extend email client functionality and connect it with company systems.
- Currently leading development of the company's in-house CRM platform using Symfony and Node.js, leveraging AI-assisted development tools (Claude Code) to accelerate delivery.
